

Hunter Biden's Laptop (\$LAPTOP)

Project information report | Data collected 1 October 2026 | Sources: MiCAR white paper (attached file), laptoptoken.com, CoinGecko, CoinMarketCap

This report records information from the sources above. It contains no analysis or investment recommendation. Market figures change continuously.

1. Project overview

Item	Details
Project name	Hunter Biden's Laptop Project
Token / ticker	\$LAPTOP (LAPTOP)
Asset type	Meme coin, ERC-20 on Base (Ethereum layer 2, optimistic rollup). The white paper classifies it as an "Other crypto-asset" under MiCAR (not an ART or EMT).
Description (white paper)	A meme project focused on internet culture, built around a single collectible token. Stated mission: turn one of the internet's most talked-about moments into a shared community.
Website message	"Reclaim the narrative" - the site describes the token as putting the story back in Hunter Biden's hands.
Holder rights	No governance rights, no utility, and no rights or obligations beyond holding, storing and transferring the token.
Contract (Base)	0xB095274743941e953c746F9C228DA9c18Bb6ec29
Launch / TGE	9 September 2026 (CoinMarketCap and white paper)
Website	laptoptoken.com
CoinGecko categories	Meme, PolitiFi, Base Meme

2. Legal entities and people

Party	Information (per white paper)
Person seeking admission to trading	Phoenix Veritas Ventures Ltd, registered 26 March 2026 in the British Virgin Islands (BVI). LEI: 98450001A3B1BFFE8455. Initial share capital: USD 1.
Sole director / shareholder	Phoenix Veritas Foundation (Cayman Islands, incorporated 23 March 2026 as an exempted limited guarantee foundation company)
Foundation director	Bryce Howarth (Grand Cayman)
Persons involved in implementation	Bryce Howarth, Luis Powery (Cayman Islands); Hunter Biden, Herve Larren (United States)
Role of Hunter Biden	Described as co-founder in the white paper; as founder on CoinMarketCap
Business activity	Supports issuance and administration of \$LAPTOP, manages the distribution model, community airdrops, and event-driven burn/release mechanisms
Financing	Approximately USD 1,400,000 from a private loan, allocated to product development and art, and consultancy and legal/compliance. Fully diluted value on 31 March 2026: approximately USD 50,510.
Governing law	BVI law; BVI courts
Trademark	"LAPTOP" and the laptop mark are trademarks of Phoenix Veritas Ventures Ltd

3. Tokenomics

1,000,000,000 Total supply at TGE	35% Unlocked at TGE (350,000,000)	36 months Fully unlocked from TGE	1.75% Burned (website)
---	---	---	----------------------------------

Allocation	Share	Notes
Day 1 airdrop	10%	Fully unlocked
Future airdrop	10%	Fully unlocked. Tokens unclaimed 30 days after the claim window opens are burned (white paper)
Liquidity	10%	Unlocked
Foundation Treasury	5%	Controlled by Phoenix Veritas Foundation
Founders	30%	6-month lock-up, then 24-month linear monthly vesting
Predictions / Events	30%	12-month cliff, then 24-month linear monthly vesting
Charity	5%	At least 5% committed to charity (website)

The white paper lists 650,000,000 tokens as retained by the issuer (item G.5).

Supply adjustment mechanisms (white paper G.12-G.13)

- Community airdrop: tokens unclaimed 30 days after the claim window opens are permanently burned.
- Events allocation (30%): each event is a binary outcome that must occur within a set timeframe. If it occurs, that event's tokens are burned. If not, they are released for donation to charity.
- The Foundation determines whether event milestones are met. The token is non-inflationary. No price protection, buyback or compensation scheme exists.

Website statistics: burned 1.75% (unclaimed airdrop tokens plus event tokens whose outcomes came true); donated to charity: 0.

4. Prediction markets linked to supply (website)

30% of supply is tied to 30 real-world events. The website shows the first 12 (probability of "Yes" at collection time, per Kalshi / Polymarket):

#	Event	Category	% supply	Yes
1	President Trump is impeached during his term	Politics	3%	67%
2	Democrats win the House in 2026	Politics	2.75%	91%
3	Democrats win the Senate in 2026	Politics	2.75%	62%
4	A Democrat wins the 2028 presidential election	Politics	2.75%	65%
5	2026 Nobel Peace Prize winner is NOT Donald Trump	Culture	2.5%	98%
6	Clarity Act becomes law by 2028	Crypto	1.5%	30%
7	\$LAPTOP FDV exceeds \$TRUMP FDV (deadline 9 Sep 2029)	\$LAPTOP	1.25%	No live market
8	Trump's approval rating falls below 37% by 2027	Politics	1%	84%
9	US overdose deaths decline in 2026 (deadline 31 Dec 2028)	Culture	1%	No live market
10	Trump family is pardoned	Politics	1%	72%
11	Bitcoin reaches a new all-time high (deadline 9 Sep 2029)	Crypto	1%	No live market
12	Netanyahu loses the 2026 Israeli parliamentary election	Politics	0.75%	67%

Event resolution criteria: laptopoken.com/event-resolutions.pdf. Website categories: Politics 12, Crypto 6, Culture 5, \$LAPTOP 7.

5. Technology and audit

Item	Details
Token standard	ERC-20 on Base; Ethereum uses proof-of-stake consensus
Audited contract	LaptopOFT: a LayerZero-based Omnichain Fungible Token (OFT) using a burn-and-mint mechanism for cross-chain transfers. Fixed global supply of 1,000,000,000, initially minted on Base.
Audit	Hacken, final report 23 April 2026. Four findings (1 Low, 3 Informational), all fixed before the final report.

Item	Details
Transfer restrictions	None at contract level. Founders and Events allocations are subject to contractual lock-up/vesting. Trading platforms may apply geo-fencing (e.g., OFAC-sanctioned jurisdictions).
Energy use (CCRI)	0.07118 kWh, period 26 May - 8 June 2026

6. Listings and trading venues

Source	Venues
Website (where to buy)	KuCoin, Gate, Bitvavo, Kraken, Aerodrome (DEX), Fomo, Pump
White paper (admission to trading sought)	Coinbase, Bybit Europe, Uphold, Bitpanda, Bitvavo, Kraken
CoinGecko markets (16 pairs)	Gate, Bitvavo, KuCoin, Kraken, LBank, Bitrue, Aerodrome Slipstream, Uniswap V3 (Base) and others. Largest 24h volume: LBank (about USD 970 thousand, 41.44%).
MiCAR scope	Home member state: Netherlands (NL), plus 29 host member states. Admission to trading only; not a public offer and no funds are raised.

7. Current market data

\$0.07752 Price (CoinGecko)	\$0.07862 Price (CoinMarketCap)	\$27.3M Market cap (CoinGecko)	\$76.4M FDV (CoinGecko)
---------------------------------------	---	--	-----------------------------------

Metric	CoinGecko	CoinMarketCap
Rank	#747	#597
24h change	-0.1%	+1.06%
24h range	\$0.07678 - \$0.07836	\$0.07712 - \$0.07938
24h volume	\$1.50M	\$2.28M
Market cap	\$27.33M	\$27.51M
FDV	\$76.36M	\$77.24M
Circulating supply	352.5M	349.99M (35.62%)
Total supply	985M	982.49M
Max supply	1B	982.49M
All-time high	\$199.51	\$401.12 (9 Sep 2026)
All-time low	\$0.06532	\$0.0653 (24 Sep 2026)
7-day change	+8.0%	-
14-day change	+67.1% (as displayed)	-
Holders	-	33.67K
Perpetuals (CoinGecko)	Open interest \$1.986M; 8h funding rate -0.0722%	-

The two sources differ on ATH, total supply and circulating supply because of differing methodologies. A Benzinga article (via CoinGecko) reported a decline of about 99% from the peak after the token topped a USD 50 billion market cap at launch.

8. Price chart

Daily closing price (USD), 12 September to 1 October 2026. The final point is CoinGecko's live price at collection time.

Source: CoinGecko historical data. Data for 9-11 September 2026 (launch period) was not available in the table accessed.

Daily data

Date	Close (USD)	Market cap (USD)	Volume (USD)
2026-10-01 (live, day incomplete)	\$0.077520	\$27,771,475	\$1,588,252
2026-09-30	\$0.078784	\$27,573,125	\$693,221
2026-09-29	\$0.078222	\$27,427,340	\$2,655,909

2026-09-15	\$0.259748	\$76,182,838	\$12,412,962
2026-09-14	\$0.214600	\$91,465,685	\$13,434,817
2026-09-13	\$0.269017	\$106,913,774	\$17,503,065
2026-09-12	\$0.296983	\$145,913,368	\$25,365,979

9. Risks stated in the white paper

- Meme token with no intrinsic utility or value; price driven by sentiment; may fall to zero. No committed roadmap.
- High volatility, possibly thin liquidity, exposure to market abuse (pump-and-dump, spoofing, front-running).

- Founders and Events allocations are subject to lock-up/vesting; their release or sale could add downward price pressure.
 - The Foundation controls the Events allocation and Treasury and decides whether event milestones are met.
 - Reputational and political-association risk, which could lead to delistings.
 - Platform risk (outages, insolvency, delisting), regulatory risk, private key risk.
 - Smart contract risk despite audit, Base network risk, MEV on DEXs, cyberattacks on front-ends.
 - Not covered by EU investor compensation or deposit guarantee schemes.
- Mitigations stated by the issuer: independent third-party smart contract audits and building on the Base network.

10. Regulatory status of the white paper

- MiCAR white paper, version 1; publication date 18 September 2026; notification date 9 September 2026; type OTHR / MODI; language: English.
- The document states it has not been approved by any competent authority in an EU Member State, and the person seeking admission to trading is solely responsible for its content.
- Digital Token Identifier (DTI): X51GNKD7C; functionally fungible group DTI: 929TXLFWK.
